

Clarinet mouthpieces

Bb german and austrian systems

D

NEW

Mouthpieces designed for German system clarinet while using French cut reeds

- **M30 D and B40 D:**

The length and diameter of the shank, the bore, the appearance of the tip rail and the external shape are the components of this new concept, which offers a perfect balance between a very warm sound and great intonation.

- **BD5 D:**

Adaptation of the BD5 Black Diamond mouthpiece for Boehm Bb clarinet, the BD5 D produces a round, centered sound and offers a great stability and flexibility in playing.

56 rue Lepic and V21 reeds are particularly recommended for these mouthpieces.

	CODE	COMMENTS
NEW BD5 D	CM1805	The perfect balance between a dark, rich, yet compact sound.
M30 D	CM36188	A good balance between timbre and roundness.
B40 D	CM36078	Produces a compact and centered sound.

German clarinet mouthpieces designed for use with German reeds

The German Tradition. Available in three openings, this Series is the German system standard reference. Its new design meets all acoustic expectations. Deep, warm sound and intonation are the main qualities of this series.

	CODE	COMMENTS
D2	CM3822	A rich, centered and compact sound; the standard reference.
D4	CM3824	Medium-open mouthpiece with the qualities of the D2 model. An excellent compromise between richness of sound and projection.
D6	CM3826	Large and warm sound, in full conformity with the German tradition.

Austrian clarinet mouthpieces designed for use with Austrian reeds

	CODE	COMMENTS
VA0	CM390	A very closed mouthpiece.
VA5	CM395	Versatile and easy blowing, the standard reference.
